Education

University of Pune - SPPU

Bachelor of Technology in Computer Engineering

june. 2022 – May 2026

Pune, Maharashtra

Technical Experience

Backend Development Practice

2024 – Present

Self-Directed Learning

- Built multiple backend systems while learning HTTP protocol, authentication and web security concepts.
- Practiced API development, debugging requests using Postman and analyzing request-response lifecycle.
- Studied server-side vulnerabilities including improper headers, rate limiting and access control logic.
- Used Git for version control and Linux environment for development workflows.

Projects

Blog Backend API | FastAPI, Python, REST, Authentication, CORS

2025

- Designed and implemented a modular RESTful blog backend using FastAPI with structured routing and dependency injection.
- Built authentication flow (signup/login) handling cookies, headers, sessions and HTTP status codes following web standards.
- Implemented backend security concepts including CORS policies, rate limiting and header-based access control.
- Modeled database schema and performed ORM-based CRUD operations for posts and users.
- Practiced low-level web concepts: HTTP methods, request lifecycle and server-client interaction.
- Managed project using Git and isolated environments via Python virtual environments.

Technical Skills

Languages: Python, C, JavaScript, SQL

Backend & Web: FastAPI, REST APIs, HTTP Protocol, Cookies, Sessions, CORS, Authentication

Databases: SQLite, Relational Schema Design, ORM Concepts

Security Concepts: Access Control, Header-Based Auth Logic, Rate Limiting, Request/Response Analysis

Tools & Environment: Git, GitHub, Linux, Bash, Postman, Virtual Environments, VS Code, Vim
